## ABOUT THE PROGRAM

- . This motivating and child-centred program has been designed to simplify the teaching of Indonesian across the school, from Kindergarten to Grade 6 (from age 5 to age 12).
- . The program can be implemented by a language teacher across the school or by individual class teachers with a background in Indonesian. Either way, the children's knowledge is consolidated and then extended each year.
- . The rationale behind the sequence charts is that teachers should find them easy to adapt for integration with other classroom subjects.
- . The program provides continuity between school years, consolidating language development, and increasing Indonesian awareness gradually. It sets realistic goals for the children's abilities and limited classroom time.
- . This program can be used in conjunction with other programs that your school or Education Department have written. It can also be built upon by high schools.
- . The program is designed to meet the needs of students new to the Indonesian language and of those who have a background in it. Newcomers will not be threatened. Neither will native speakers be bored. An enjoyable selection of classroom activities will reinforce the learning process and keep the interest of the children.
- . Extensive photocopying and endless searching for resources have been eliminated. The children are encouraged to use their creativity instead. By involving the children in development of classroom activities, they are more inspired to learn.
- . *Positive Reinforcement.* The constant thread of this program is the encouragement of class participation through positive reinforcement. At every opportunity, it is suggested that teachers provide small, tangible rewards for trying and verbally praise them as well.

- . The program is not set in concrete. Teachers should feel free to adjust activities to suit the children's specific needs, abilities and interests.
- . The children's reading and writing skills are heavily supported by the teacher. The children are involved in the following main learning areas on a regular basis:

- listening
- reading
- writing
- communicating
- interacting

- . The lessons in this program can be shuffled about to support other classroom work. This will help to make the program more integrated into the children's overall education, improve its effectiveness in delivery and to establish the legitimacy of foreign language learning alongside mainstream subjects at Primary levels.
- . One of the most important features this program has to offer is the **TIME** it saves teachers. Teachers with an already hectic timetable will find that this program allows them to step simply through the lessons and teach effectively and successfully.
- . I wish you a happy and successful time in implementing this program.

## INDONESIAN LESSON 3 - TIME

### Resources

### KINDERGARTEN

#### THE CLOCK

Show the children a large clock and discuss the features. These could include the long and short hand, the second hand, the twelve numbers, electric or battery operated. Tell the children what the clock is called in Indonesian. The children can repeat the word after the teacher.

Each child in the circle can tell the class what his/her special time of the day is.

The children draw a large picture of a clock on a piece of paper. In the middle of the clock the children draw their favourite activity as discussed previously. The children can label their clocks in Indonesian.

#### Follow-up Activity - Time

The children can share their work with the class.

## INDONESIAN LESSON 3 - TIME

### Resources

### YEAR THREE

#### MORNING, AFTERNOON AND NIGHT

Using flashcards and a large clock, revise a variety of times in Indonesian. The children can find the matching flashcards from the floor. Introduce morning, afternoon and night, in Indonesian using flashcards. Explain how they relate to AM and PM in English.

Ask the children to think of a special time of the day. A child at a time can come to the front of the class, demonstrating his/her time on the clock. In Indonesian, the child states the time and whether it is morning, afternoon or night. In English he/she also says why that time of day is special. For example:

Jam berapa sekarang?  
What's the time now?

Jam sembilan pagi	It's 9:00am
Jam setengah dua siang	It's 1:30pm
Jam lima sore	It's 5:00pm
Jam setengah duabelas malam	It's 11:30pm

Using paper plates, scrap pieces of cardboard and coloured paper the children can make their own bright sunny clock. Encourage the children to make the clocks on their own, unless they really need assistance.

#### Follow-up Activity - Time

The children can go around the class and show a variety of friends a time in Indonesian, using morning, afternoon and night. The children also say what they are doing at that particular time.

## Resources

### YEAR SIX

#### ALL TIMES

Introduce the rest of the times that a clock shows. Explain to the children that once the pattern of telling the time has been learned it will be easy to tell the time in Indonesian. For example:

Jam dua	2:00
Jam dua lewat dua belas menit	2:12
Jam dua lewat lima belas menit	2:15
Jam dua lewat dua puluh menit	2:20
Jam setengah tiga	2:30
Jam tiga kurang dua puluh menit	2:40
Jam tiga kurang lima belas menit	2:45
Jam tiga kurang dua belas menit	2:48
Jam tiga	3:00

*lg clock*

Give all the children a piece of paper and ask them to write two times in digital form. New times are to be explored. Form the circle again and one by one, the children demonstrate their times on the clock and then say them in Indonesian. Go around the circle twice.

*sm paper*

#### Follow-up Activity - Time

The children can write two more times on paper and then go around the class reading them to friends, in Indonesian. The listener confirms the time or assists.

## ABOUT THE AUDIO CDS

- The audio CDs have been designed to help language teachers provide students authentic pronunciation models.
- These audio CDs make the integration of language learning in primary schools more achievable.
- The audio CDs cover all the vocabulary (words and sentences) from each lesson in the K-6 Practical Program. Alphabet pronunciation is also included for each language.
- A listening post can be set up in the classroom or library to encourage students to practise their oral language skills.
- Male and female speakers alternate eg Year 1 - male and Year 2 - female.
- The full kit includes 8 CDs in total. One for each year level and an additional one for classroom expressions, greetings and communication skills.

- Each lesson is introduced in English for easy reference.
- The vocabulary is delivered at an easy to follow pace.
